## PROFILE

Experienced VBA Developer with 5+ years of experience in creating advanced solutions using VBA programming. Skilled in developing macros, automating repetitive tasks, and creating custom Excel functions. Adept at creating complex financial models and data visualisation tools. I am holding a Microsoft Office Specialist certification in VBA and a degree in Computer Science. Committed to delivering high-quality solutions that improve efficiency and productivity for clients.

At the beginning of my career, I received experience in the Planning Technician role, where the primary responsibilities were to create a job description for every line worker, optimizing and planning the creation of electrical harnesses for Lamborghini Urus.

## EMPLOYMENT HISTORY

### VBA Developer, La Lumi Inc.

1. Writing and maintaining VBA macros and scripts for various Microsoft Office applications such as Excel, Word, and PowerPoint.
2. Automating repetitive tasks and creating custom functions and interfaces to increase efficiency and productivity.
3. Manipulating data within Office applications using VBA, such as data validation, data import/export, and data analysis.

### Planning Technician, Drăxlmaier Group, Bălți

1. Creating the job description for every Lamborghini Urus line worker.
2. Optimizing of the processes and planning of the creation of electrical harnesses for Lamborghini Urus.
3. Collaborating with the quality assurance department to ensure that all harnesses meet the required quality standards.
4. Troubleshooting and debugging VBA code to ensure it is functioning correctly.
5. Staying up-to-date with new features and developments in VBA and Microsoft Office.
6. Collaborating with other team members to create and implement new VBA solutions.
7. Continuously updating and improving existing VBA code to ensure optimal performance.

### IT Support Specialist, Lyceum of the Academy of Sciences of Moldova

1. Providing technical support to users by answering questions, troubleshooting problems, and resolving issues related to computer hardware, software, and networks.
2. Installing and configuring computer hardware, software, systems, networks, printers and scanners.
3. Responding to service tickets and troubleshooting issues through remote support or on-site visits.

4. Providing training and guidance to users on how to use various software and hardware tools.
5. Monitoring and maintaining computer systems and networks to ensure they are running smoothly and efficiently.
